TABLE MICRO-DEBRIEF SHEET

Use after scoring each round. Score first, then discuss for 2-3 minutes. Record one key takeaway to bring into the final debrief.

Each round: 1 Complete outcomes tracker → 2 Reflect briefly → 3 Record one key takeaway

Table / Team: _____ **Recorder:** _____ **Final Score:** _____ **Biggest Trade-off:** _____

ROUND 1

What did you notice during the first round of movement? 1

Record the conversion and the result, or the reason you chose not to convert.

- ☐ Bottleneck
- ☐ Open capacity
- ☐ Surprise

Table response / notes:

ROUND 2

Based on what your table added or opened, what impact did that decision have? 2

Record the Action taken and the impact you noticed.

- ☐ Opened Diversion
- ☐ Added Program
- ☐ No system change

Table response / notes:

ROUND 3

If your table converted a program, what changed? If you did not convert a program, what influenced that decision? 3

Record the conversion and the result, or the reason you chose not to convert.

- ☐ Converted Program
- ☐ Did not convert
- ☐ Consensus issue

Table response / notes:

ROUND 4

If your table converted a program, what changed? If you did not convert a program, what influenced that decision? 4

Record the conversion and the result, or the reason you chose not to convert.

- ☐ Converted Program
- ☐ Did not convert
- ☐ Backlog changed

Table response / notes:

ROUND 5

Based on your final simulation outcome and final system map, how successful was your system? What trade-offs shaped that result? 5

Record your final simulation outcomes, strongest result, and biggest unresolved pressure.

- ☐ Low score
- ☐ High housing exits
- ☐ Unsheltered pressure

Table response / notes:
